29

Investments TTM (PitchBook)

No direct Hopkins GP alumni identified. However, JHU faculty co-founders appear in multiple JHTV therapeutics companies squarely in Frazier's target areas — Adventris (Yarchoan, JHU oncology) and Ashvattha (Rangaramanujam, JHU). Strong basis for warm introductions via JHTV.

FIRM OVERVIEW

Founded	1991
HQ	Seattle, WA
AUM	\$7.72B total; FLS XII = \$1.3B

TrustCommerce	Healthcare IT	Buyout Add-on, Feb 2026	Healthcare payment processing platform for hospitals and health systems.

SECTOR FOCUS

Oncology	Rare Disease	Drug Development
- Company creation and early-round privates — partnering from preclinical to IPO with >20% equity ownership - Oncology (~40% allocation), ophthalmology, immunology, rare/metabolic disease — unmet medical need focus - Modality-agnostic: small molecules (~50%), mAbs/biologics (20-30%), cell/gene therapy — best-in-class science only - Cross-strategy synergy: venture and long-only public funds support portfolio companies from seed through commercialization		

JHTV PORTFOLIO MATCHES

Adventris Pharmaceuticals Jen Herbach & Mark Yarchoan Best-in-class KRAS cancer vaccine for PDAC; IND 2026, raising Series A. JHU oncologist co-founder — core oncology fit.	Ashvattha Therapeutics Jeffrey Cleland & Kannan Rangaramanujam Dendrimer nanomedicines; Phase 2 data in wet AMD, DME, and neuroinflammation; raising \$45M crossover. Frazier's ophthalmic lane.
Egret Therapeutics Daniel Chai EGT-101 reprograms M1 monocytes to resolve inflammation; Seed raising \$20M. Fits Frazier's immunology focus.	Agnos Therapeutics Mandeep Singh & Robert Johnston Mutation-agnostic cell therapy for inherited retinal disease; pre-seed \$2.5M, Orphan Drug Designation pending. Rare disease lane.
