Active Portfolio Companies

Seed → Series B

Stage Focus

25

Investments TTM (PitchBook)

No direct Hopkins GP alumni identified. However, JHU faculty co-founders appear across multiple JHTV companies aligned with Mayfield's Engineering Biology thesis — DELFI Diagnostics (Velculescu, JHU oncology) and Adventris Pharmaceuticals (Yarchoan, JHU).

FIRM OVERVIEW

Founded	1969
HQ	Menlo Park, CA
AUM	\$3.0B total AUM; 33 funds
Dry Powder	\$433.99M in Mayfield XVII; \$1.81B total
Fund III Close	May 8, 2023
Stage	Seed, Series A, Series B Seed: 7.8% · Series A: 23.6% · Series B: 46.5% · Series C: 10.8% · Series D+: 8.9%
Check Size	\$1M–\$15M (seed to growth)
Geography	United States

SECTOR FOCUS

Engineering Biology	Healthcare AI	Enterprise AI
- Engineering biology platforms — CRISPR systems (CasΦ, base editing), synthetic biology, and mRNA diagnostics backed from Day Zero - AI-first diagnostics — liquid biopsy, multi-omic disease prediction, precision maternal/fetal health; proven with Mammoth and Mirvie - Healthcare operations AI — autonomous clinical workflows and AI nurse teammates that measurably reduce hospital labor costs at scale - Inception-stage conviction — partners with scientist-founders pre-product and pre-team; 382 exits across 55-year history		

LAST 10 INVESTMENTS

Company	Sector	Note	Description
Sekai	Consumer	Ser A, \$20M — Jun 2026	Multimedia and design software platform; Series A round with 8 co-investors.
Exaforce	Enterprise	Ser B, \$125M — May 2026	Network management software company; Series B with 6 co-investors.
OpenLight	Semiconductors	Ser A1, \$50M — Apr 2026	Application-specific semiconductor company; silicon photonics platform for AI workloads.
NeuBird	AI	Seed, \$19.3M — Apr 2026	AI-powered software development and DevOps automation platform; seed stage.
Cognichip	Semiconductors	Ser A, \$60M — Apr 2026	AI-assisted chip design and EDA platform; accelerates semiconductor R&D cycles.
SambaNova Systems	AI Infra	Ser E, \$350M — Mar 2026	Full-stack AI infrastructure — custom SN40L chips plus enterprise AI software platform.
Frore Systems	Semiconductors	Ser D, \$143M — Mar 2026	AirJet solid-state active cooling chips for laptops and data center edge devices.
Rhoda AI	AI	Ser A, \$450M — Mar 2026	AI hardware platform; large Series A reflects emerging AI infrastructure demand.
Multiply	Enterprise	Early VC, \$9.5M — Mar '26	AI productivity and workflow automation software for business teams.
Pensive	EdTech	Seed, \$6.8M — Feb '26	AI-powered educational software platform for personalized learning.

JHTV PORTFOLIO MATCHES

DELFI Diagnostics Victor Velculescu & Rob Scharpf AI-powered fragmentomics liquid biopsy for multi-cancer early detection; \$225M raised; JHU Kimmel Cancer Center. Mirrors Ursheet's Mirvie thesis — liquid biopsy platform for a massive unmet diagnostic need.	Adventris Pharmaceuticals Jen Herbach & Mark Yarchoan Engineered KRAS cancer vaccine for pancreatic cancer; IND 2026, raising Series A. JHU oncologist co-founders align with Ursheet's engineering biology platform thesis.
Egret Therapeutics Daniel Chai Small molecule (EGT-101) reprogramming M1 inflammatory monocytes to resolve inflammation; Seed, raising \$20M. Precision immunology mirrors Ursheet's Endpoint Health investment thesis.	Ashvattha Therapeutics Jeffrey Cleland & Kannan Rangaramanujam Hydroxyl dendrimer nanomedicine platform; Phase 2 data in wet AMD and neuroinflammation; raising \$45M crossover. Targeted precision delivery fits Ursheet's engineering biology focus.

WHO WE ARE MEETING WITH

	Ursheet Parikh General Partner GP at Mayfield since 2013, co-leading Engineering Biology practice. Key investments: Mammoth Biosciences (CRISPR unicorn), Mirvie, Qventus, Balbix, Versa Networks. Prior: founder/CEO StorSimple (acq. Microsoft 2012); Cisco, Microsoft. IIT Mumbai B.S.; Wharton MBA.
	Navin Chaddha Managing Director Managing Director at Mayfield since 2006; led HashiCorp, Lyft, Poshmark, Marketo to IPO. 20+ years VC; Forbes Midas List.
