Investments TTM (PitchBook)

Dr. Kavita Patel joined NEA in 2017 as Venture Partner (healthcare) while simultaneously practicing primary care at Johns Hopkins Medicine — a direct, current employment-level tie. NEA has deep Maryland roots: co-founder Frank Bonsal Jr. (ex-Alex. Brown & Sons) was a Baltimore investing pioneer, and NEA maintains a Timonium, MD office. PGDx (Personal Genome Diagnostics), a JHU Kimmel Cancer Center spinout founded by Drs. Velculescu and Diaz, received an NEA-led Series A (\$21.4M, 2015) and co-led Series B (\$75M, 2018); acquired by Labcorp 2022. Former NEA GP David Mott was previously CEO of MedImmune (Maryland).

FIRM OVERVIEW

Founded	1977
HQ	Menlo Park, CA
AUM	\$35.58B total; NEA 18 early-stage = \$3.05B

JHTV PORTFOLIO MATCHES

CurveAssure Evan Haas AI video-based MSK assessment platform with \$500K+ ARR — no hardware required. Fits NEA's thesis on production AI that creates real economic value and outcome-grounded metrics in clinical workflows.	CurieDX Therese Canares & Rashmi Sachan B2B SaaS platform using AI and computer vision to predict disease from smartphone images for telehealth practices. Seed stage, raising \$1.3M, with \$2M+ in sales pipeline and partnerships at JHU and Brown.
SafeTower Kumar Subramaniam & Eileen Kasda AI-powered patient safety and grievance operations platform with wide adoption at Johns Hopkins. Auto-categorizes clinical risk events and surfaces hidden signals — enterprise SaaS with proven hospital traction.	Semaphor Tito Porras, Mathias Unberath & Axel Krieger AI autonomy framework and SDK backbone for surgical robotics — enables real-time automation from task assistance to full procedures. 51 related patents, 100% success on critical gallbladder removal steps in preclinical trials.

WHO WE ARE MEETING WITH

Thomas Joshi | Associate, Technology

Joined NEA in 2025, focused on seed/early-stage tech. Co-author of Stanford DSPy — the leading open-source AI framework from Stanford, used by Meta and Microsoft. Prior healthcare AI work sharpened his focus on the 'utility problem': production-grade evaluation and outcome-grounded metrics. Columbia B.Sc. AI.

Rick Yang | Partner, Head of Technology

Leads NEA's technology practice since 2007; fintech, consumer, and AI. Portfolio: Plaid, Robinhood, MasterClass, Factory.
